Topic 1. Sustainability of current and future forestry operations in NSW

Sustainable forestry requires the planting of more trees.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Tree removal is threatening our wildlife who need a home and a food supply

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

If demand for timber products is high, we need private forests and the planting of more native trees.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Yes more tree plantations

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Forestry is NOT to tear down fragile environmental areas

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

We need clean air through the sound management of all trees and forests.
