Topic 1. Sustainability of current and future forestry operations in NSW

Current forestry operations in NSW are not sustainable. We are currently subsidising the destruction of our own environment and sentencing iconic species to extinction. The industrial logging of our native forests is shameful and must stop now.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Forests are worth more if they are alive! Once our animals are gone we can not bring them back. Stop logging native forests. We have rare and beautiful animals and loads of opportunity for eco-tourism. We need healthy forests not the destruction of habitat that is going on at the moment.
