**Topic 1. Sustainability of current and future forestry operations in NSW**

Old growth forests should stop being logged immediately, including all state forests. Big Spotty and the area this significant tree is in needs to be protected forever. Only logging plantations from now on.

---

**Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

Greater glider tourism? Eco tourism, including camping and nature walks - people want this. Especially when led by local Aboriginal groups.

---

**Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

More recycled products, no old growth logging.

---

**Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests**

All old growth forests protected, and given a carbon and biodiversity credit system of some sort.
