Topic 1. Sustainability of current and future forestry operations in NSW

It's a no brainer to stop all logging of native forest and only use plantation timber

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

We need to allow these species on the brink of extinction to survive, even to thrive again eventually, let's hope so

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Well, stop exporting to start with, that should leave plenty of timber for construction I

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

I'm totally against logging of native forest even if private, they are home to our wildlife

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Yet to be proven to be for the greater good and not the greed of a few
