Topic 1. Sustainability of current and future forestry operations in NSW

When the forest is selective sprayed with a preemergent to encourage a type of eucalypt. The diversity is changed. Diversity of species creates a healthy environment for plants and animals. We need diversity.

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Value the forests for its ability to house fauna and create oxygen for us. A place of rest and revival for visitors
My son recently visited a state Forest where logging is about to take place. He said it was dead. .

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Transition to hemp and sustainable materials

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

We as a state can't continue to keep forestry corp afloat. It's not viable. And such a loss of environment for crates and pulp

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

On reviewing approvals it is clear that the green light has been given at sites without a comprehensive nocturnal fauna survey. The debris if wasted timber is burnt. Such a waste.

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Leave it alone don't carbon capture. Appreciate it for what it is
