Dear Independent Forestry Panel, please accept my submission into the sustainability of current and future forestry operations in NSW.

I am in full support of ending the logging of our native forests. I'm 13, and these forests are part of me and my peers' future lives. We need an environment that is healthy and thriving for a future worth living in. This forest logging causes harm to wildlife and ecosystems. While I may not know as much as an adult, what I do know is that chopping down trees and our native forests is only going to cause pandemonium and trouble for everyone.
