Subject: NSW Forestry Industry Submission
Date: Sunday, 13 October 2024 11:58:37 PM

Dear Forestry Industry Panel,
The Forestry Industry Action Plan needs to respect & have reverence for human life by prioritising the health, safety & welfare of Australian people instead of Woke ideology, racially divisive schemes/agendas, confected cult-like climate lunacy & [REDACTED] - by ensuring our own affordable & far superior Timber is readily available by all sustainable means for desperately needed housing materials, for construction, mining, transport and retail, as well as for stable, long term jobs

Self sufficiency of our own Australian Timber supplies is vital

The last thing we need is unbalanced Climate Change Hysteria supporting RenewaBULL deforestation & ECOCIDE - through propaganda like Delburn Wind EG Works - "A Forest Based Renewable Energy Project" - set to be built in Latrobe Valley Pine Plantation - Strzelecki Ranges

<https://reneweconomy.com.au/delburn-wind-farm-edges-closer-to-construction-in-latrobe-valley-pine-plantation/amp/>

This is Woke nonsense - completely devoid of common-sense, Fire Safety, Engineering Facts, Scientific Rigour, Integrity & Ethics - destroying our iconic landscapes & swathes of precious ecological habitat with hazardous industrialised Solar/Wind/BESS - the antithesis of Caring for Country & Protecting Nature
This Contaminating JUNK has NO benefits whatsoever & will poison our essential life-sustaining Soil & Water sources with Solar's heavy metal leachate, Turbine Blades shedding Bisphenol A (lethal to young children - as toxic as blue asbestos & PFAS from Big Batteries

It's non-sensical & very wrong that indigenous groups are being inveigled into wrecking their healthy food resource land & uncontaminated water sources by Hosting ecologically destructive, FIRE Hazardous energy infrastructure that will ruin the biodiversity & environmentally sensitive areas such as near Hay - which they will be burdened with long after the shoddy carpetbaggers desert their damaging infrastructure in the wetlands, etc where there's a plethora of threatened species

Plans by Forestry Corporation to Host Wind Turbines in State forest softwood plantations will never "balance renewable energy together with the existing uses of the State forests including timber production, recreation, tourism, apiary and grazing" as obnoxious Wind Turbine monstrosities are a contaminating, destructive & hazardous land use - with Turbine Fires an Extensive Risk, blades shedding Toxic Bisphenol A (lethal to young children - as Toxic as Blue Asbestos), serrated blade parts dangerously flying off new Turbines - up to 800m away, pylons from Turbine bases muddying the groundwater, extensive ecological harm & death to multitudes of endangered & vulnerable birds, bats, flying foxes & gliders, etc

****WIND TURBINES ARE A FAKE GREEN SCOURGE - SHEDDING TONNES OF MICROPLASTICS FROM WIND TURBINE BLADES (KNOWN AS 'LEADING EDGE EROSION') - AFTER ONLY A FEW YEARS OF OPERATION.**

****Bisphenol A** - a toxic chemical used in the epoxy resins that are used to make turbine blades High speed spinning blades 300 KM/H collide with dust particles, rain and hail chipping off small particles of the resin coating

The particles eroded from Wind Turbine blades includes epoxy resin which is 40% Bisphenol (BPA) - a frequently banned endocrine disrupter & neurotoxin" - equally as toxic as blue asbestos & lethal to young children 11 Nov 2023

****Bisphenol A Pollution from Wind Turbines** - Tim Smith 13/07/2023

"Bisphenol A is the most toxic substance we know"
- Swedish Environmental Protection Agency
<https://docs.wind-watch.org/Bisphenol-A-Pollution-Wind-Turbines.pdf>

**** Will Bisphenol A be the PFOS of Wind Energy?**

https://www.zeeland.nl/sites/default/files/digitaalarchief/IB23_b50318e9.pdf

****Wind Turbines Damage Human Fertility**

<https://bergensia.com/bisphenol-a-in-wind-turbines-damages-human-fertility/es-human-fertility/>

****The wind industry openly admits that any turbine will shed at least 60kg of microplastics per year into the atmosphere which will find their way into soil profiles and waterways.** That would be the equivalent of about 50 tons of pure unadulterated BPA pollutants over the life of a typical 100-turbine wind farm (20 years) finding its way into catchments

****Russell Coad - Golden Plains Farmer finds 'liberated' - serrated parts of Turbine Blades on his property - some 750-800m from the Turbine!**

https://www.heraldsun.com.au/news/victoria/golden-plains-farmer-finds-parts-of-wind-farm-turbine-on-property/video/7937c746ac82a61259e8142313c23587fbclid=IwY2xjawF3EhhlcHRuA2FlbQlxMQABHcVhQ3SizRc33dBEZHCCN9pHBGYbWlWTRJYh_JI4aN1aPVNeQhLuXLpeQA_aem_RHnRrtRhpMYPz3dHudmeg

Wind Turbine Fire

****GROUND WATER SUPPLIES MUDDIED BY PILE DRIVING FOR THE MASSIVE WIND TURBINE BASES.**

****Wind farm woes continue as Victorian turbines fail after only five years - www.cairnsnews.org - 11th April 2024**

<https://cairnsnews.org/2024/04/11/wind-farm-woes-continue-as-victorian-turbines-fail-after-only-five-years/>
Overseas in Ontario, Canada, farmers are regretting the day they signed up with wind farm operators back in the early 2000s What they didn't bargain on was their groundwater supplies being muddied up by pile-driving for the massive wind tower bases and the ongoing effects of blade vibrations Incredibly, some claim that the vibrations cause deformities in the feet of livestock
Bill Clarke, an independent hydrogeological consultant who ran Waterloo Geoscience Consultants Ltd, says he is opposed to those developments that may cause serious and possibly irreparable damage to the environment

National Koala Recovery Plan is clear, unequivocal and must be applied to development proposals undergoing Federal Environmental Assessment

Page 80 of the National Koala Recovery Plan states that the following activities should be avoided:

- clearing of habitat used by Koalas for feeding and resting
 - reducing connectivity between patches of habitat used by Koalas for feeding, resting, commuting and dispersing (either by clearing of vegetation or by the erection of barriers to passage)
 - clearing of habitat used by Koalas during extreme events (heat waves, drought/fire refuge)
 - activities that will expose Koalas to additional threats (e.g. dogs, cars) in places where Koalas must use the ground to move between resting and feeding trees
- The Federal Minister for Environment must STOP approving 'renewable' projects that are inconsistent with the National Koala Recovery Plan

Halt further destruction of endangered koala habitat You can download a copy of the Guide here <https://tinyurl.com/5y9ddm24>

To read the National Koala Recovery Plan, see [National Recovery Plan for the Koala Phascolarctos cinereus \(combined populations of Queensland, New South Wales and the Australian Capital Territory\) \(dceew.gov.au\)](#)

****Biodiversity Offset Crisis**

<https://www.crikey.com.au/2023/05/18/biodiversity-offsets-scheme-crisis/>

[Biodiversity offsets](#) are arguably one of the most damaging environmental policies in a smorgasbord of bad policies, according to the environmental community...

Offsetting has become [a trading market](#) with no real transparency or demonstrative environmental benefits. Proponents self-refer projects, both at the NSW government and federal levels.
