Topic 1. Sustainability of current and future forestry operations in NSW

The need to end native forestry is of the utmost importance , with the the amount of threatened and endangered species In our state struggling because of our expansion.m of housing development etc

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Forests are very important to indigenous people with thousands of artefacts and Important country to connect to culture aswell as save the threatened species

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

Pine forests outside of state forests are sufficient

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Native forestry must end , plantations will always have a place along as corridors of native bush land are still intact

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

State forests are unique in that they allow a vast amount of activities and connection to culture with less restriction , however if they cut all the native forest down what is the point

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Stop cutting down native forest in nsw is a great start
