Dear Independent Forestry Panel Secretariat.

Submission into the sustainability of current and future forestry operations in NSW.

I request that native forest logging in NSW cease operations to preserve the remaining natural environment and the eco-systems that they support.

I request the following:-

- Please end native forest logging in NSW. This is not a sustainable practice and is causing irreparable damage to the native forests of NSW.
- Please end logging in native forest regrowth areas that are falsely referred to as plantation. There are large areas of NSW forests that were harvested by hand many years ago that have great natural value and should be valued for their natural integrity.
- Please ensure that all future logging is based on sustainable plantations.
- Priority must be given to protecting endangered species.
- Native forest logging is a financial burden to the people of NSW and should cease.

Thank You
Peter Wing
