Topic 1. Sustainability of current and future forestry operations in NSW

Not sustainable now or in the future

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Indigenous peoples never cut down their trees Of course they had no say when the English arrived and started hacking into magnificent forests Time to stop native forest logging and let people in a hundred years time see what we will never see Magnificent Forests supporting wildlife

Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail

There are alternatives Time to step up and use them

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

No future in native forest logging on private or public lands Use alternative materials stop cutting down living forests

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

The Forestry Corporation is only interested in making money Make the money from tourism and recreation People love to see areas of great natural beauty and to see the wildlife that lives there

Topic 6. Opportunities to realise carbon and biodiversity benefits and support carbon and biodiversity markets, and mitigate and adapt to climate change risks, including the greenhouse gas emission impacts of different uses of forests and assessment of climate change risks to forests

Carbon credits Nonsense Who thought that was a good idea ? WHO benefits? Trees are essential! It's time to realise we can't live without trees, so let them grow!
