**Topic 1. Sustainability of current and future forestry operations in NSW**

---

Isn't it outrageous what Australia's greed has done to our natural environment. Who are they? Forrestry not the biggest but are taking out the last habitat refugees farmers with land clearing legal and significantly illegal are the primary cause of animal extinctions and climate change and will want taxpayer to support them in future farming pursuits that have failed because of their own actions. A massive amount of Australia cleared WA a million acres a year and still doing it all across Australia as we speak and now are robbing our rivers of water for fiber crops like cotton from greed of over allocation and don't care about anyone else let alone the environment. What a disgrace.  
Yours Sean

**Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models**

---

Haven't farmers land cleared enormous excessive amounts thus adding to climate change
