Topic 1. Sustainability of current and future forestry operations in NSW

I fully support an immediate end to native forest logging and a future industry based on sustainable plantations;

Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

Native forest logging is driving the endangered koala and greater glider to extinction. An immediate logging moratorium should be placed over core greater glider and koala habitat while the FIAP process is underway;

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

The true value of our native forests comes from their critical role in carbon storage, providing a clean and reliable water supply, providing critical habitat, recreation and spiritual connection.
