Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values

- I fully support an end to native forest logging and a future based on sustainable plantations.
- Logging of native forests is leading to the extinction of species, such as the Greater Glider and Koala and so cannot be described as sustainable.
- Logging public native forests is costing the taxpayer millions and leading to permanent damage to our forests.
- We need healthy forests for holding carbon, cleaning our water, providing habitat, improving fire management, providing recreation, spiritual connection and logging native forests damages all these values.

Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs

Bamboo and hemp should be made into viable sustainable industries. Govt needs to; set up infrastructure.

Topic 5. The role of State Forests in maximising the delivery of a range of environmental, economic and social outcomes and options for diverse management, including Aboriginal forest management models

Leave our native flora alone, it has been decimated and the time has come to stop.
