### **Topic 1. Sustainability of current and future forestry operations in NSW**

The evidence is clear that current rate of timber harvest is incompatible with forest sustainability.

---

### **Topic 2. Environmental and cultural values of forests, including threatened species and Aboriginal cultural heritage values**

I am seeing more threatened wildlife including large marsupials, echidnas and lyre birds unnaturally wandering onto roads as their habitats diminish.

---

### **Topic 3. Demand for timber products, particularly as relates to NSW housing, construction, mining, transport and retail**

The business case for wild native timber is not convincing.

---

### **Topic 4. The future of softwood and hardwood plantations and the continuation of Private Native Forestry in helping meet timber supply needs**

Existing plantations and cleared lands could fulfil the demand, provide wildlife shelter and offset carbon emissions.
