| Attachment: N/A                |  |

Submission date: 11/1/2024 11:02:11 AM

*The proposed location for the Moss Vale recycling plant is totally unacceptable because of its close proximity to thousands of properties which would be within the area of pollution, especially the release of microplastics into the atmosphere and land plus noise and huge increase in traffic in the area. There would be implications for the safety of water and the Sydney and Southern Highlands catchment areas. The tourism industry in the Southern Highlands would be impacted greatly. The health and safety of the wellbeing of my family and grandchildren would be impacted with serious health issues for generations.*

*This proposed plant will mainly be a plastics destroyer and dump with very little recycling. There are later technologies for a recycling solution.*

*Please find a suitable alternative location in an environmentally safe area that is not going to impact people.*
