Over the last four years I have had revealed to me many proposals or decisions, on our health and well-being that will impact us into the future. It seems to be the big corporations and government have all the control. We the people have no control. All plastic is bad for the environment. Micro plastics are being detected everywhere in the environment. Recycling plastic will never be good for the environment. I have live in the Wingecarribee all of my life (70yrs) and I do not support this development in anyway.
