This development will have an impact on my grandchildren who live close by to the site. One of my grandsons has major respiratory issues and I cannot see how a development like this which will distribute toxic fumes into the air will help his lungs.

My daughter and her husband (who was born and raised in the area) will sell and leave their home in the highlands if this goes ahead and they will have a property with reduced value as a result, as will many others in the area.

A site like this needs to be isolated in the middle of nowhere, not along side homes of families.
