*I am a volunteer with Southern Highlands Landcare Network. We work along the Wingecarribee river and its tributaries to create habitat corridors and remove weed species to enhance biodiversity of local species. This work has been going on since the 1990s. It is important for many reasons but one of the key ones is that it helps to ensure the quality of the water that reaches Warragamba dam and supplies greater Sydney. It is my understanding that the proposed development has the potential to add plastics to the water ways as well as other pollutants as well as change the amount of water entering the river. I believe it is the wrong spot.*
