I have spent over 40 years in coordinating riparian restoration works along local waterways in an attempt to restore and maintain biological integrity of our local area. I have a B. Sc. Degree in limnology and am alarmed at any possible further impacts to our streams. High levels of PFCs have already been documented in platypus, an iconic species under threat in our local streams. I am not encouraged by any assurances of environmental safeguards from this company. I am perplexed as to why they want to locate to a relatively pristine environment surrounded by nearby suburbia. People are attracted to live in the Southern Highlands for its pristine environment and this proposal will have damaging social and environmental impacts.
