I am concerned about the building of the plastic refinery in moss vale, regarding its proximity to residential areas and the environmental/health impacts. Especially the lack of transparency concerning the synthetic additives used in the recycling process and the potential for 16,000 litres of water being to discharge in the sewerage each day contaminated with phthalates and microplastics which needless to say are extremely harmful to one's health.

I strongly disapprove of this plastic refinery and hope you take my submission seriously
