I do not approve of this proposed development, for various reasons.

Firstly the impact on the local community with regards to the known toxic residues as a result of the processes and materials been used.

Secondly the chances of toxicity to the local environment, water facility's, farmland/agriculture, could be seriously impacted from a safety aspect.

Thirdly the high chance of impact to human health (local community residents) from all the inevitable toxic waste by-produced produced, is of major concern to the entire southern highlands community.

If this proposal is pushed through the anger and lack of trust from the the local community will be extensive, and the irreparable damage that would surely insure as a consequence.
