I am objecting to proposed development for the following reasons:

1: ongoing serious questions and insufficient detail about how the proposed development will prevent microplastic contamination of surrounding areas and water catchment.

2: significant social, infrastructure, environmental and traffic impact from the large number of heavy vehicles that will be servicing the plant. This applies not just to Moss Vale but also to those other local townships through which this traffic will flow.

3: proximity to residential property and visual, dust, noise and smokestack fallout from the facility.

4: the negative impact on the significantly residential nature of Moss Vale.

I understand that there are alternative potential locations where the development would be more welcome and would urge the developer to reconsider and relocate the development.
