Location: New South Wales 2576	
Attachment: N/A	

Submission date: 11/6/2024 2:42:07 PM

The proposed Plasrefine application should not proceed, for the following reasons:

- 1. The application is inadequate around public interest, safety and site suitability*
- 2. The proposal does not adequately assess the operating model and, critically, the risks of nano, micro plastic and forever chemical leakage*
- 3. The site is located on a watercourse that feeds into Warragamba dam - Sydney's largest drinking water catchment*
- 4. The contents are highly flammable. In the event of a fire the typical outcome is to burn down contents. Further, the local fire brigade is not equipped to deal with fire of this scale*

All in all, this site is not suitable as it is too close to sensitive residential, schools, retirement / nursing homes, biodiversity and drinking water
