The proposed recycling plastics facility will not only bring massive increased traffic but would be situated 100m from residential housing and 400 meters from a child care facility. I understand plastics need to be recycled but the location proposed is such an inappropriate site. This type of facility should be located in a remote area. Trains should be considered as the means of transportation for the plastics to a remote location. The southern highlands is renowned for picturesque countryside and fresh air. The area would suffer immensely from such a facility. Please do not approve a facility that would pollute and contaminate such a pristine area. The southern highlands needs to remain clean as a food bowl and water supply for Sydney.
