*I object to the Moss Vale Plastic recycling proposal. The environmental impact with endangered and threatened species that exist within Moss Vale, including platypus would be impacted due to the environmental impact of recycling plastic. The location is also close to two large schools and there could be a direct impact on their health. Moss Vale is growing and more people are moving into the suburb. It is the wrong place to put a plastic recycling firm. It needs to be in an area less densely populated, away from threatened and endangered animals and not near schools.*
