Submission ID: 211032

Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses)</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/1/2024 6:45:58 PM

The plastics recycling facility cannot go ahead. The health of our community and wider community should not be compromised! Research shows that we are potentially exposed to microplastics through water, inhalation, and skin contact. We know that microplastics stay in the body for years (often stored in tissues), and microplastics are linked to a number of acute and chronic health issues including oxidative damage, fertility issues, immune dysfunction and some cancer. Do not let this go ahead!
