Dear commissioner, I forgot to add to my last submission that The state government needs to take into account the recent ruling regarding the submission by the Local residence against Hume coal all of the environmental issues and all of the planning codes, the contamination issues have already been done and have been submitted and they apply equally as to this submission for recycling of plastic. The other issue is the Wingecarribee Shire Council was found to be corrupt and eventually was disbanded and an interim council appointed because of the failures of procedure and transparency and corruption regarding Hume Coal Defeat. Might I suggest that you refer to this as it will Surely save you an enormous amount of money and angst because the same group is now going to be involved in objection to plastic recycling
