Why would anyone want to destroy the Southern Highlands by allowing this recycling plant to go ahead. There needs to be a more suitable area that won't impact the residents as badly as this will. The Highlands don't have enough infrastructure to cope with this, the microplastics will be everywhere and to say this won't be the case isn't true: by allowing this to go ahead you will be allowing the entire Southern Highlands to be destroyed. If you bones tgecarea you would understand. Listen to the concerns of the residents who can articulate themselves better than me. Please don't allow this to go ahead. We should be protecting the land and waterways.
