*I am a 17 year old and have been living here all my life. Me and all people my age will be directly affected by this. The highlands is renowned for being a clean and beautiful area. I do not want to be exposed to all the trucks, particles, pollution, etc. the extra trucks will cause so many issues. Many people my age experience detrimental car accidents, and the addition of hundreds of trucks on the roads that already littered with pot holes, and poorly lit will just cause so many additional injuries and potential death. The highlands is not the right place! Other places like Parkes and port Kembla have already asked to take it. This [REDACTED] is not welcomed here. [REDACTED] THIS IS NOT THE RIGHT SITE. It will affect generations to come, whether it operates for one month or 50 years. GET RID OF IT NOW. This is absolutely ridiculous and outrageous. The southern highlands prides itself on being clean. Look at bundanoon, just 15 minutes away. Bundanoon has completely eradicated the use of plastic water bottles. The southern highlands is a clean place because of the people's actions. Read below for my extra ideas.*

**\*\*Subject: STRONG OBJECTION to Plasrefine Proposal in Moss Vale\*\***

To the NSW Independent Planning Commission,

*I write with an uncontainable fury at the audacity of even considering the Plasrefine plastics recycling facility in Moss Vale. This project is not only an insult to the intelligence and rights of this community but a catastrophic threat to our health, environment, and way of life.*

- \*\*ENVIRONMENTAL DESTRUCTION\*\***: *The proposed site threatens to poison our air with microplastics and toxic chemicals, while the waterwaysâ€™ two riparian zones critical to the Wingecarribee Riverâ€™ stand to be polluted beyond repair. Do you grasp the severity of irreversible contamination? Are the profits of a corporation worth sacrificing our lifeline?*
- \*\*HEALTH HAZARDS\*\***: *Plasrefine's operations will compromise the air we breathe and expose families to hazardous emissions. It's unconscionable to endanger children, farmers, and residents for a project so recklessly close to schools, homes, and agriculture. What level of irresponsibility would allow such a toxic blight on this community?*
- \*\*UNBEARABLE TRAFFIC CHAOS\*\***: *This facility will introduce a flood of heavy vehicles operating up to 11 hours a day. Moss Vale's infrastructure is ill-equipped for this assault, and the risks to public safety are staggering. Who will take responsibility for the inevitable accidents, noise, and pollution?*
- \*\*A GROSS INSULT TO OUR COMMUNITY\*\***: *For years, Moss Vale has loudly rejected this abhorrent proposal. Residents, council members, and even local MPs like Judy Hannan and Wendy Tuckerman have voiced their outrage. Ignoring us is not governance; it's betrayal. How dare you consider a project the community has so clearly condemned?*
- \*\*DESTROYING OUR IDENTITY\*\***: *Moss Vale is not an industrial dumping ground. It's a community of families, farmers, and a thriving local culture. This monstrous facility will devastate our town's character and crush its future potential within the Southern Highlands Innovation Park. Do you truly care about sustainability, or is that just lip service?*

**New South Wales Government**  
Independent Planning Commission

*Let me be clear: this project is a travesty. If approved, it will irreparably damage Moss Vale's environment, health, and reputation. Decision-makers must reject Plasrefine outright and prove that public welfare still matters in planning decisions. The people of Moss Vale will not be silenced, nor will we forgive those who jeopardize our home for corporate greed.*
