Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: Western Australia 6062	
Attachment: N/A	

Submission date: 11/15/2024 11:40:55 AM

0800 Western Standard Time. Friday 15th December. Multiple calls to the independent planning commission, a government organisation of public servants, go unanswered. Instantaneously this reflects the ineptness of this department- how can this department be responsible for major tasks when they cannot answer a simple phone call?

The proposed Moss Vale Plastic Recycling Facility. A venture by [REDACTED] under the title of Plasrefine, a new company planning on the development of a greenfield site within the Wingecarribee council in the NSW Southern highlands. No.1 question is does this new company (Plasrefine) have a 'safety case'? If not, their proposal should be automatically opposed and cancelled.

No.3 question is why are we giving [REDACTED] much latitude and are forgetting of the [REDACTED] I am aghast to thinking anything positive about [REDACTED]. They have zero respect for [REDACTED] - environmental - people. It is a mindset and approach they exercise wherever they do business from. Why do we consider them as trustworthy operators and expect that they'll have respect for Australia and our country / land / environment? Again, the Australian people are being disadvantaged by the greed and short sighted nature of the government. We are not a democratic country. The people's voice is not important anymore. Decisions regarding proposals like this are making Australian's more racist I feel. So very annoyed how my taxes are being wasted by the Australian government. There are way too many oxygen thief's amongst Australia's public sector. [REDACTED]
