Proposed site is inappropriate due to use and population surrounding it. Traffic, noise and cost of fuel for trucks are an environmental nightmare for the district. Pollutants from the chemical processes involved may poison the surrounding areas when ventilated as well as runoff going into our high quality water catchment. This proposal is a terrible idea and the community does not want it. The process doesn't seem to have been very democratic and Australians lives will be directly impacted in a very negative environmental changes to the precious landscape and infrastructure in Moss Vale. As a recent resident of and current worker in the Southern Highlands, I am scared of the consequences to people I love who live near the proposed facility and current and future generations of children I teach who will be impacted by the variety of pollution that this facility will create. Please do not let this go through and find a more suitable site.
