The main reasons I object to the development of plasrefine in Moss Vale:

- 1. The impact of the increased traffic flow on an already increasingly congested road systems which affects all residents directly on a work, daily living and social level;*
- 2. The surrounding area to the proposal is residential and includes schools and childcare centres. The increased activity on roads from the processing plant will have obvious environmental impacts and risks for the community. No amount of increased risk is acceptable. Therefore a poor choice of location.*
- 3. No denying that plastic recycling is necessary in this world however not in such a poorly chosen location which has such high potential for impact on the local community in which I live. There are surely many other locations that would be more suited than a densely populated rural area.*
