As a 13 year old boy I with a love for sport and spending my days outside on the farms riding bikes. With the pollution in the air I wouldn't be able to do the activities that make me feel happy. I started year 7 this year and I catch the bus to school everyday and with the trucks the traffic would make it so much harder to get to school everyday. I also have a big interest in playing soccer professionally and with the pollution limiting my time outside I would be unable to do soccer as easily. I also believe the pollution would make it harder for me to breathe while playing sport. THIS IS GOING TO IMPACT SO MANY TEENAGERS LIVES!
