This proposal is completely out of character with the existing land use in the area.

Moss Vale is a pristine town. With no industry or factories of this nature the damage to the local environment will be incalculable .

The impact on residents lives will be massive not only with potential toxic pollution but also the visual and noise impacts of an industrial factory being built and operating in a rural setting surrounded by family homes.

The catastrophic affect this development will have on the lives of people living in the surrounding area with noise and an absurd amount of Truck movements 24 hours a day is just completely untenable.

The owners of this development are not local people and will not be affected personally. They do not appear to have any experience in recycling plastic which is even more concerning.

I urge you to immediately withdraw any approval for this completely inappropriate development.

My family and I moved from Sydney to the Southern Highlands to enjoy the clean air and country lifestyle and not be impacted by factories with their noise and ugly infrastructure.

Moss Vale is a small country town completely unsuited to heavy industry and multiple truck movements It is a quiet rural community with many young families as well as vulnerable older people who have come here to have a quiet and peaceful lifestyle in the country and not have their lives turned upside down with a giant factory spewing out goodness knows what level of pollution to our pristine local environment.

I walk every day beside the Wingecarribee river which is at the moment pristine and the thought of pollutants escaping into this waterway filled with natural wildlife is just terrifying as well as completely unnecessary.

I implore you to please cancel this proposal immediately.
