I object to this proposal. This is not far enough away from growing communities and the environmental and health impacts on the local area would certainly be irreversible. Our local infrastructure would not be able to cope with the extra traffic. As the local economy relies on the area being a busy tourist destination. The visual and environmental impacts would make this stunning area a less desirable tourist destination, damaging the local economy.

This company does not care for the community and does not have enough experience to be building and running the facility.
