*Strongly objecting to a plastic factory in such a beautiful natural environment.*

*In a country that has already banned the use of plastic straws, plastic bags and plastic disposable cutlery this makes no sense.*

*To manufacture this toxic waste in our country only to ship it out for use of others is abhorrent.*

*NSW government should be ashamed to allow such a business to be pushed through here in this state.*

*Your one time pay off will bring generations of destruction and contamination to this land that will be felt by many of our children's children.*

*This is not the type of business we need to attract, this is the opposite to the new green deal.*

*Shameful at best that the NSW government is incentivising [REDACTED] companies to use our land and resources to benefit themselves with total disregard for the people and traditional owners of this land.*
