Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/21/2024 12:29:29 PM

Quite simple this development is NOT THE RIGHT SITE.

it's not that I don't believe that something needs to be done to solve the safe disposal of plastics but this is not the right location for gigantic processing plant.

It beggars belief that anyone could possibly think this is okay.

Dangerously close to residents, schools, farms, and Garvan Institute for cancer research.

For four years the Moss Vale community and the local council have been fighting this development and it appears to have fallen on deaf ears.

GHD man's been ducking weaving and moving the goal posts at every turn. Lying outright to the community from the beginning. It is massive overreach by the NSW government. Now can anyone think this is the right place for this kind of plant.

Local roads would not coal with the massive truck movement. Not to mention the huge fire risk. Contamination of drinking water.

The Southern Highlands is a pristine tourist area. Already people are saying they will not visit if this development is passed. Local businesses will suffer..

We will keep fighting.
