This proposal is way too close to our children's schools and daycare centres! How can the advice be given to our youth that they should limit their time outside to minimise exposure to air pollutants???. Why should kids not be allowed and indeed 'scared' to go outside lest it affect their health? It is mind boggling that anyone would allow such pollution around our youth and exposing them to the very real danger of fire in their area? Our people have the right to feel safe and feel able to play freely outside without fear.
