*Attention Panel*

*I draw your attention to GHD letter with revised details of the time it takes for roller doors to open and shut. From 5 hours to 42 minutes!!! Please will you now insist on a real life trial with 19m trucks and fast acting roller doors to ascertain once and for all how long the doors will be open in a 24/7 day. Incidentally, how do the employees enter the buildings? It seems to me also that the trucks are being asked to maneuver in confined spaces? It doesn't matter how shielded the plastic is by waste water tanks, when a strong wind meets an immovable object it becomes very turbulent. I can see that in my garden. GHD plans are constructed round a perfect day with perfect weather with perfect operation. Perhaps you can see why the community is so frustrated. GHD plans chop and change all the time. It will be a travesty of justice if Plasrefine is given the green light.*

*As for misunderstanding GHD when we were told to stay inside to avoid fallout, that is another example of GHD whitewashing their ineptitude. It certainly was said along with other remarks which completely disrespected the community. We were also told it was up to the community to police the project. Meanwhile, what has GHD got to lose... Nothing It walks away squeaky clean leaving the community and Council to mop up its mess.*

*I am sorry but I am really upset.*
