This is not the right site.

There will be impact on schools in the area with heavy traffic use.

Plastic micro particles in the air

Plastic micro particles and pollutants going into the water system.

It needs to be in a different area.

If fires break out which has happened in other refineries there is little fire service available in the immediate area.

The company involved has no experience in this and appears to not care about the community it impacts on.

Their plans also do not show the huge chimney stacks on plans submitted.

It is disgusting that the government has not taken any of this into account
