Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: <i>New South Wales 2577</i>	
Attachment: N/A	

Submission date: 11/16/2024 6:36:03 PM

*The site is wrong too near the town schools preschools hospital shops and residences . The pollution that would enter the Wingecaribee river would result in problems with Sydney drinking water as the river feeds into Waragamba dam .The wildlife including platypus would suffer there are many migrating birds on the river . Moss Vale could not cope with increased traffic The Illawara Highway runs through the main street already causing traffic congestion .The public haven't been told whether or not the facility will be taking recycling from overseas .A facility like this should not be built in such close proximity to towns. A suitable site would be one not near any residences and farming land with access directly from a motorway . With the planned increase in housing in Moss Vale and Bowral a lot more people will be affected by this facility .Not the right site*
