The recycling project will create a substantial increase in traffic on the M5 and local roads. The M5 is already a nightmare with traffic congestion at most times of the day and large scale housing developments along the corridor, Moss Vale and Bowral will make it more difficult. The rail link to Sydney is appalling and unfit for commuting pushing more people into the roads. The local roads around Moss Vale are also highly congested as all traffic through to Canberra shares the main shopping road. We are also concerned about potential pollution impacts on the watershed and local agriculture and air pollution.
