*I object to this facility being built here as it's totally not suitable for the area. The local residents should not have to risk their air quality that they moved to the area to benefit from.*

*The site chosen is not suitable for inbound and outbound truck traffic. The size of the facility is detrimental to the surrounding environment.*

*The local residents and council strongly oppose the project and are not being listened to by the state government. How can this possibly happen if in the environmental report they admit air quality of locals living in the area will be affected and they should limit their time outside. Children live in the area and we wouldn't know the long term effects of exposure to this polluted air.*
