I am extremely concerned about the ongoing health impacts (micro plastics in water sources and airborne micro plastics and waste) of this facility, in such close proximity to our community. I'm concerned about the increase in traffic/trucks/safety around the site. I am very worried about the site becoming a dumping ground for extra plastic/other waste and the hazards, such as fires, that this may cause. Similar facilities in Asia have had to be shut down for these reasons. This is not the right site - this location is one of our countries most beautiful pockets of semi rural and agricultural land - it is absolute madness to think that our beautiful environment could be ruined by such a facility. Find another site. No Plasrefine in Moss Vale!!!
