I am part of the local community living about 15km from the plant and am in Moss Vale several times a week for work related matters.

I object to the project because Moss Vale is not an industrial area. I believe we need more recycling plants, but built in suitable industrial location, the exact opposite of what Moss Vale and the Southern Highlands in general are known for.

The traffic also concerns me. A hundred more trucks in and out of Moss Vale daily is more than the roads can support. The roads in the area are bad enough, unless major upgrades are planned this is not tenable. Also transport all this plastic so far is hardly good for the environment, a location closer to the source of the material seems advisable.

It has also been reported that the company behind the project has no experience in recycling.
