Urgent and Furious Objection to the Implementation of PlasRefine Facility in Moss Vale

To Whom It May Concern,

I am writing with utter outrage to categorically oppose the ludicrous and reckless decision to establish a PlasRefine facility in Moss Vale. I can barely contain my fury at the sheer negligence, ignorance, and outright arrogance that has led to this proposal—one that threatens to ruin our town, our health, and our future. Let me make this crystal clear: the people of Moss Vale will NOT stand idly by and allow this environmental disaster to unfold. The very idea that this toxic facility could be planted here, in the heart of our community, is an insult to every single resident, and I demand it be halted immediately.

Environmental Vandalism—Plain and Simple: How dare you even consider desecrating our environment with a PlasRefine facility? Moss Vale is an oasis—pristine, green, and home to breathtaking natural beauty. The very notion of turning it into a dumping ground for toxic plastic waste is an abomination. This facility will release harmful chemicals into the air, including dioxins, VOCs, and other carcinogens that will poison our lungs and pollute our surroundings. Let me remind you: these pollutants won't just disappear. They will settle on our land, infiltrate our water, and wreak havoc on our ecosystem for generations.

You're talking about putting a plastic recycling plant in a region that depends on clean water, fertile soil, and biodiversity. How can you possibly justify the irreversible damage you will cause? The chemicals that this facility will emit will inevitably leach into our rivers and groundwater, threatening not just the environment but our very survival. The idea that we could watch our local water supplies contaminated with chemicals from this facility is beyond infuriating.

Health Catastrophe Waiting to Happen: Let me be blunt: this facility is a public health time bomb. Anyone who thinks a toxic factory like PlasRefine can operate without consequences is living in a delusional bubble. You cannot claim, with any shred of credibility, that this plant will not destroy the health of our community. The exposure to dangerous pollutants such as dioxins and furans will poison our air, and our children, the elderly, and anyone with respiratory conditions will suffer. The idea that we're supposed to accept these risks is not only an insult, it is criminal negligence.

What's worse, the long-term health effects of exposure to these toxins—ranging from cancer to developmental issues in children—are well documented. Are you really prepared to gamble with our lives for the sake of a dubious recycling operation? I'll tell you this: we are not willing to trade the health of our children, our families, and ourselves for the sake of your so-called "solution" to plastic waste.

Economic Suicide for Moss Vale: Let's talk about the so-called "economic benefits" that this facility is supposed to bring. Frankly, it's laughable. Any short-term gain in jobs will be more than wiped out by the long-term damage to our property values, our tourism industry, and our local businesses. Who in their right mind would want to live in a town that's been poisoned by a toxic recycling plant? Property prices will plummet, tourism will dry up, and anyone with any sense will move away as fast as they can.

The people of Moss Vale will suffer economically and socially, and for what? To line the pockets of corporations who have zero interest in our town beyond using it as a toxic dumping ground? We will not allow our town to

be the sacrificial lamb for your profits. The economic devastation this facility will bring is unacceptable, and we will fight tooth and nail to protect our livelihoods from your reckless plan.

Unacceptable Lack of Transparency: And let's not even get started on the complete lack of transparency or meaningful consultation. Who do you think you're fooling? The residents of Moss Vale weren't consulted—we weren't even informed—before this decision was pushed forward. Do you think we are too stupid to understand the risks? This is a blatant attempt to bulldoze us into accepting something that will destroy our town, all in the name of corporate greed.

Where was the community input? Where were the public forums? You may have thought you could pull a fast one, but the people of Moss Vale are not passive, we are not silent, and we are certainly not stupid. If you thought we'd just roll over, you have another thing coming. This town will NOT be steamrolled into accepting this disaster.

Enough Is Enough: This is the point where I draw the line. We will NOT allow our town to be sacrificed for this monstrous, polluting facility. The environmental impact, the health risks, the economic ruin—all of it is completely unacceptable.

I demand that this proposal be scrapped immediately. We will not rest until this facility is shut down for good. We are prepared to fight you every step of the way, and we will mobilize every resident, every community group, and every concerned citizen to stop this project. We will make our voices heard, and we will NOT be silenced.

If you think for one second that we'll let you poison our town for your convenience and profit, you are gravely mistaken. The people of Moss Vale will stand united, and we will NOT back down.

You've been warned.

Furious and adamantly opposed,

The Moss Vale community.
