Putting this huge plastics recycling facility in such close vicinity to the Moss Vale population (or any population centre) is not really advisable. The noise, smells, and probable contamination in or near to populated suburbs should not ever happen.

The roads in the Southern Highlands are already choked with vehicles during the day and this would put quite a lot more heavy trucks on these roads when the locals are trying to use them. With planning already going ahead to add many more homes in the Southern Highlands this would seriously exacerbate the traffic problems.

As the Southern Highlands Train line already has several facilities along its route that have sidings leading to large factories in areas with much, much lower population and having unoccupied land adjacent why not cite this facility so that it can use the train line, while sharing the existing sidings (or perhaps add a new siding in another area?), to bring in the plastics for recycling and send out the finished products thus taking a large amount of road traffic off the highways and our local roads.

NOT HAPPY JAN!!!! - with the existing plan to put this recycling facility in Moss Vale.
