Organisation: N/A	Key issues: <i>Social impacts, Visual impacts, design and landscaping, Land use compatibility (surrounding land uses), Traffic, Other issues</i>
Location: New South Wales 2577	
Attachment: N/A	

Submission date: 11/16/2024 10:18:04 AM

*I was horrified to hear of this proposal. I can not understand why this has gone as far as it has in an area that is only 200 meters from residential homes.*

*When reading the information on recommendations in relation to air pollution, I could not believe that the recommendation for people with breathing issues should stay indoors with windows shut. This makes these residents a prisoner in their own homes with no quality of life when before they would be free of pollutants and able to be outside at any time. I am sure that all the residents in the highlands whether they have medical problems or not would like to not breath in pollutants everyday.*

*Another reason that I am surprised this area is a chosen for consideration is that there is a creek on the site that runs into the Wingecarribee river which then is a main feed to Sydney water, I am sure that people in Sydney would definitely not want this to happen.*

*The Southern Highlands is a very beautiful and special place that is renowned for its wonderful climate and clean air. This proposal will take that away and leave what was once a natural and clean environment into a polluted and undesirable place to live.*
