My family moved to the beautiful Southern Highlands almost 20 years ago and our Sons have grown up here. We have many friends who visit and who envy our lifestyle here. Moving here for the beautiful seasons and the quality of the fresh cool air. We decided to stay in this location and subdivide and downsize which took us almost 6 years to do. We have sold our older house and built our new one which we have lived in for almost a year. The first we heard about this proposed development was about 2 years ago when a few residents had posters outside their properties on Beaconsfield Road and the odd vehicle displaying a poster. We have never received any correspondence from the developer or GHD. It was concerning at the time but the impression was "we don't want that.. it will not happen " especially when we heard that our local Council strongly opposed it. We live 1 kilometre from this proposed site. I can not believe how quiet the community has really been regarding this matter and a big part of that is because the majority of our community has been kept in the dark and we are only now seeing some of the details emerge of this development, thanks to the diligence of concerned members of our community. The more we are learning about this project the more alarming its becoming. How can our State Government do this to our Community and the Southern Highlands as a whole, with little regard for the residents of Moss Vale. If this Toxic threat goes ahead we will have no choice but to move from the area we have called home and loved for 20 years. With that being said how are we going to be able to sell our properties and hope to recoup our investment? A spokesman for the developer has advised residents to limit their time outdoors which is outrageous!!!! We can not and will not be dictated to in this way. This is without doubt, NOT THE RIGHT SITE!
