The development is being carried out by a company who has never carried out this work before so how could the company know whether it is workable or what the consequences will be. The traffic will be horrific for the everyone and the roads will be damaged due to the heavy use. The buildings will be close to the current cancer facility and creeks and residents have been advised that they will not be allowed to go outside. If the government departments and Premier allow this to proceed then it will be the one of the most terrible decisions ever and they should be liable for the environmental impact on a rural area which will occur.
